7901 4th street N, 7374, St. Petersburg, Florida
7101 Esplanade Blvd, Suite 400 Houston Tx 77060

PRODUCT STRUCTURE

WPC

WALL PANEL / TIMBER TUBE / CEILING

When it comes to vinyl flooring, WPC, which stands for wood plastic composite, is an engineered vinyl plank that gives you a luxury flooring option for your home. This is a relatively new product on the market, and benefits from its technologically advanced construction. The majority of WPC vinyl options are thicker than SPC vinyl and range in thickness from 5mm to 8mm. WPC flooring benefits from a wood core which makes it softer underfoot than SPC. Additional cushioning effect is offered by the use of a foaming agent which is also used in the core. This flooring is dent resistant but not as resilient as others on the market.
